A voice for Offgrid

Offgrid is an independent design studio with a clear appetite for the unexpected. Its first screen is a cobalt typographic poster: a small manifesto, a ruled vertical project menu, and a large cropped Tahoe wordmark carry the identity without a promotional image. Selected work opens into three different art-directed worlds, combining original typographic compositions, photographic material, printed pieces, and purposeful changes in scale. Warm milk and marigold give the supporting pages a direct, tactile character. Visitors can switch projects to see their visual language, scope, and story, read the studio’s working principles, and build a downloadable project brief as a starting point for a future conversation.
