A voice for Offgrid

Offgrid gives a creative studio a website with the energy of a pasted-up street poster. Wide retro typography sits against cobalt blue and marigold, with fashion photography, ribbed-glass imagery and offset project frames making the work feel physical. The layout changes scale from a loud first screen to a clear project index, then a simple brief builder. Visitors can filter the work by discipline and assemble a short project note. The symbol is an open grid with one cell moved outside its frame, giving the studio a recognizable mark that expresses an idea leaving the expected structure.
